

Alberto Ramos

Originally from Portugal and currently living in Berlin, Germany, I am a hardworking, detail-oriented, and creative software engineer; a motivated and quick learner that thrives on a positive and supportive team environment.
I'm curious and excited by the entire spectrum of software development, especially frontend and UX/UI.

Professional Experience

Cognizant Netcentric Frontend Developer

Berlin, Germany

Mar 2022 - May 2023

As a frontend developer, I worked on diverse projects spanning different industries such as adhesive technologies and automotive. My main responsibility was to develop, enhance, and maintain clients' websites across multiple markets using various technologies such as AEM, React, Redux, TypeScript, and SCSS.

Talkdesk Fullstack Developer

Lisbon, Portugal

Jan 2021 - Feb 2022

As a developer in the Digital Communications cluster, my role was to oversee all non-voice interactions between agents and clients, such as SMS, live chat, and email. I was responsible for maintaining the cluster's well-structured microservice system and supporting the creation of new communication channels. This involved close collaborating with multiple teams across the company.
